BID CENTER

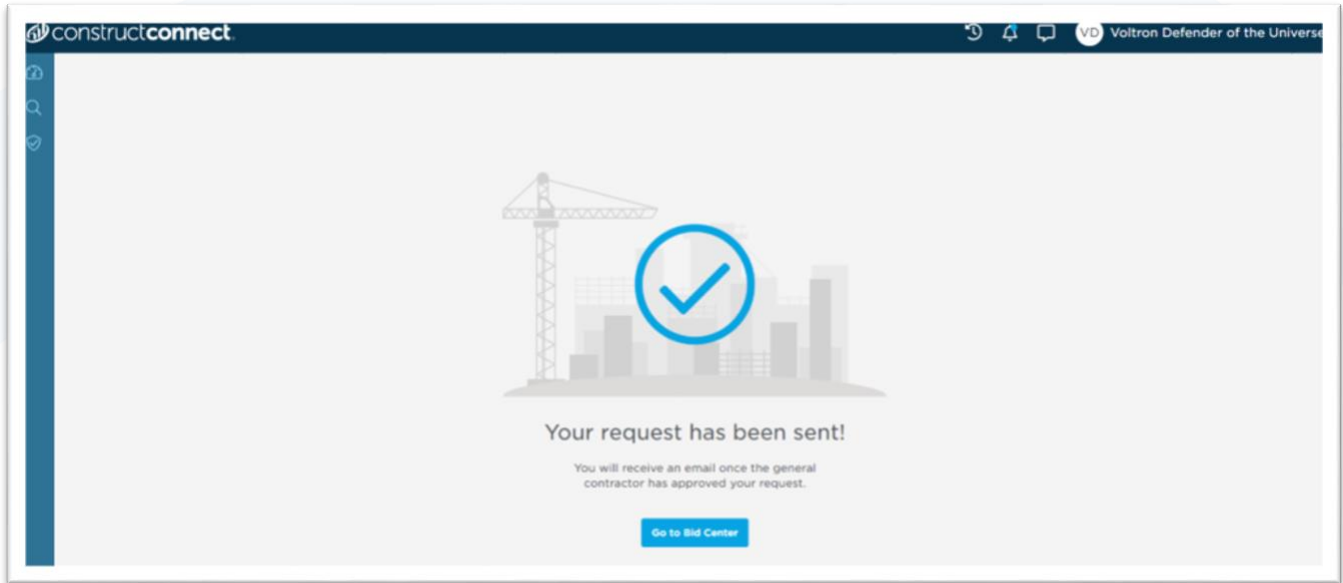

External Share – Request Access

- When a project is shared with you that requires a request for access you are now able to request access through Bid Center.
 - ✓ **Value:** Shared projects that require a request for access show up in Bid Center Inbox and you can request access by clicking on the project link.
 - ✓ **Value:** We'll notify once your access has been approved, and you'll immediately be able to view the project detail page.
 - ✓ **Value:** If you're denied access, we'll notify you and provide contact information so you can follow up if you wish.
- Requesting access happens in 3 steps!

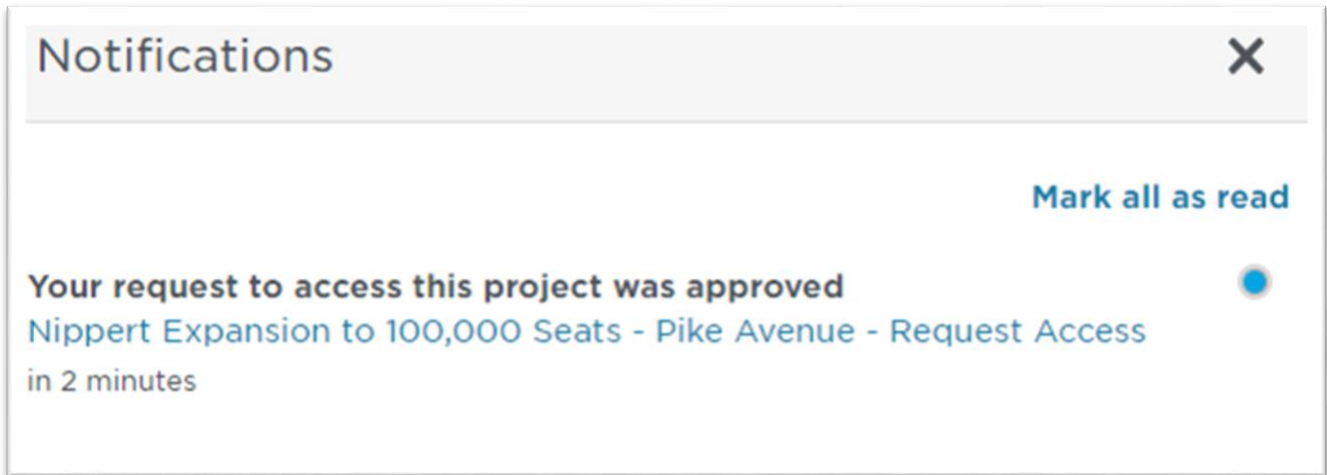

Step 1: Request Access Page

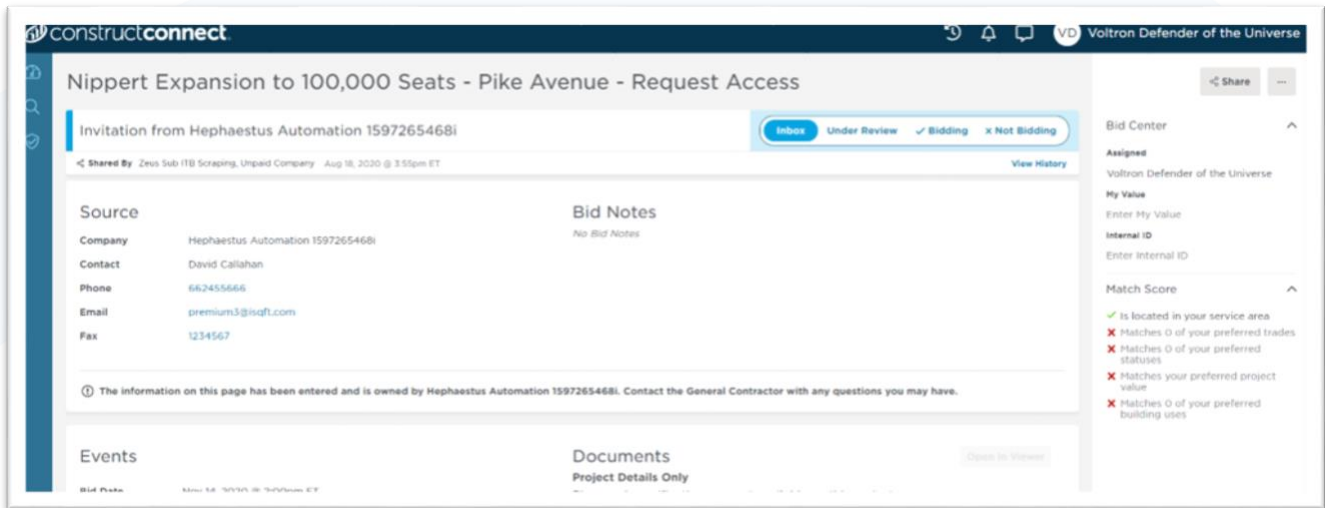

Step 2: Request Pending Page

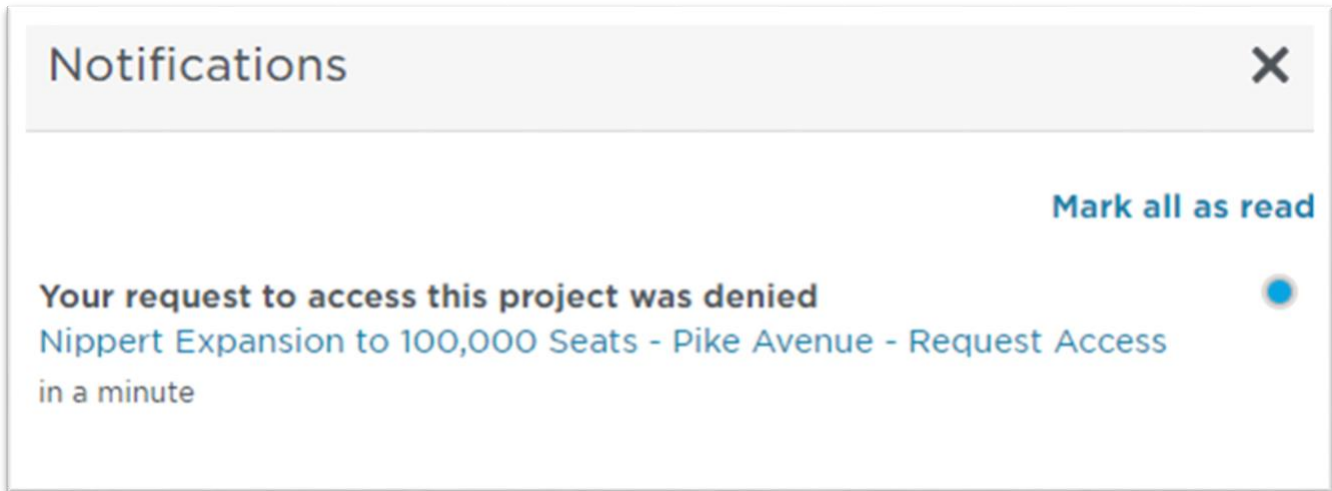

Step 3a: Access Approved...

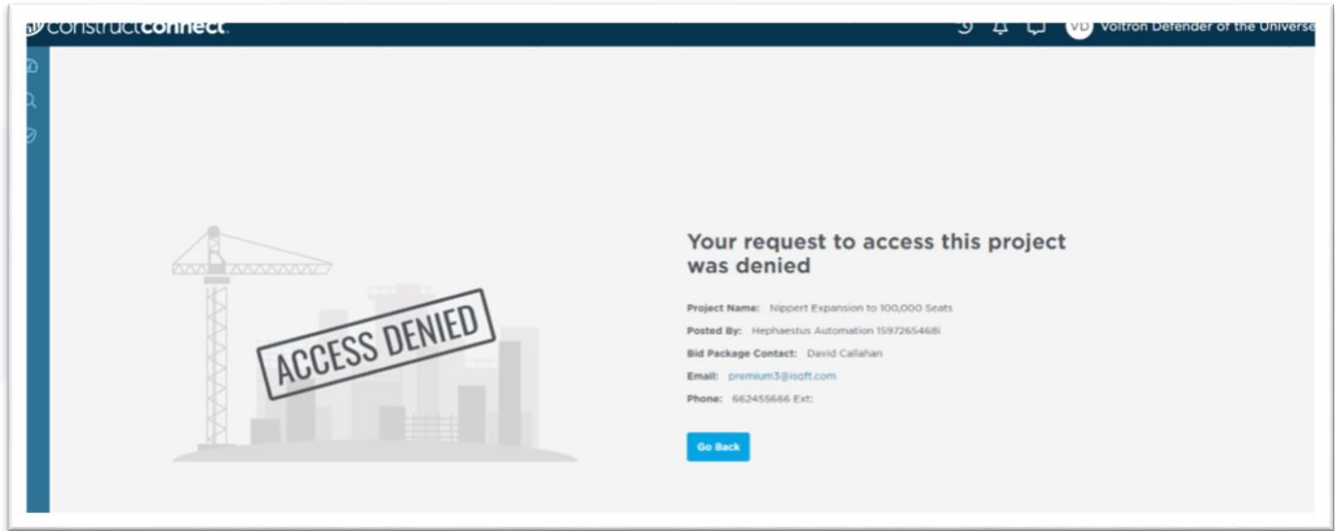

Step 3a: ... now you can see the project details page!

Step 3b: Access Denied...

Step 3b: ... you still are unable to access the project details, but you now have the contact information

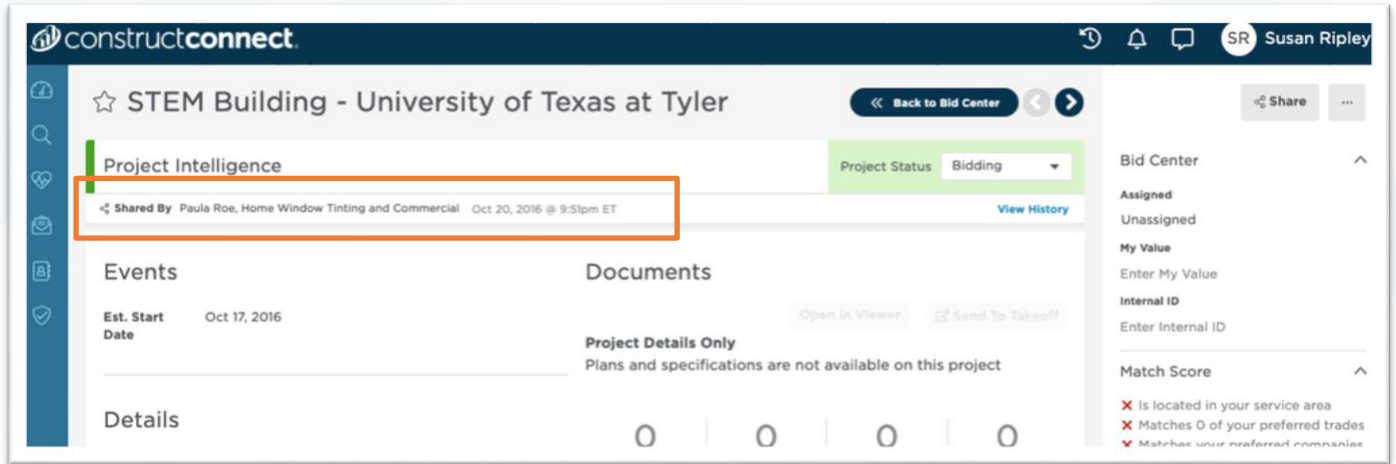

ConstructConnect ITB External Share Update – Share only the packages you want to share

- ✓ **Value:** ConstructConnect users don't have to share every package they've been invited to on a project. You can share single packages so that you only share what you want others to see.

External Share Details included on the Project Detail Page

- ✓ **Value:** External share users can now see who shared the project with them and when in the header of the Project Detail Page

CCBC Quality Improvements

- Direction of drop downs, menus, and tooltips now open into the most open part of your screen so that you don't have to scroll to see them.
- Drop downs that include a long list of options in Bid Center now include a scroll within the drop down so that it's easier to find what you need.

PROJECT INTELLIGENCE

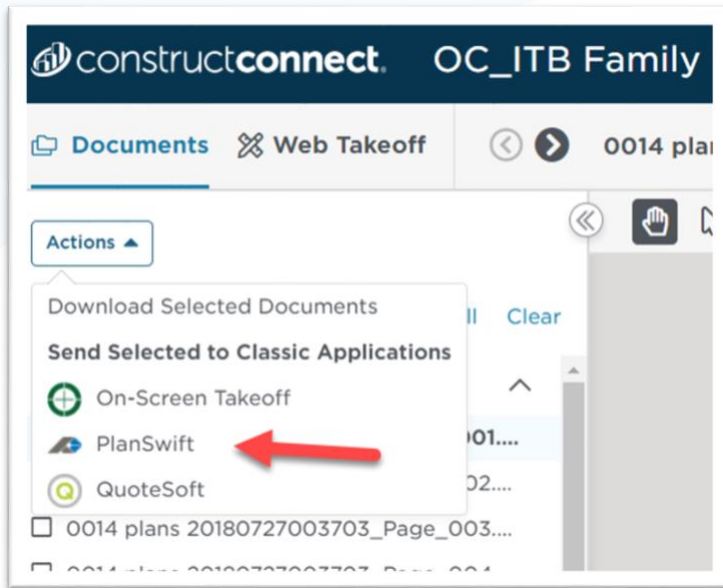

- User Management Portal opens in a new tab
 - ✓ **Value:** Smoother navigation and better user experience.
 - ✓ **Value:** User will not lose their place in ConstructConnect app when loading User Management portal

CCPI Quality Improvements

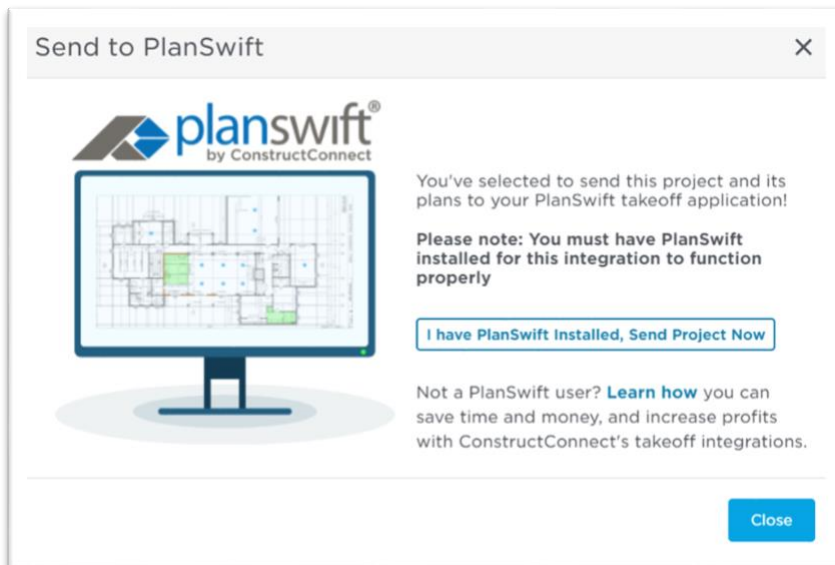

- *My Value* field on the right rail of the *Project Detail Page* now allows more than 10 characters.
- *Save button* is enabled after deleting and re-adding email address in the *Your Information* section of *You and Your Company*.
- Build Your Profile modal will accept any name entered by the customer.

DOCUMENT VIEWER & WEB TAKEOFF

Classic Takeoff Integration with Document Viewer – Planswift – Available Now!

- Existing PlanSwift users will be provided with an integrated experience to select project documents inside Document Viewer and push the documents to PlanSwift to create a job inside PlanSwift
