 - Project Intelligence Quality Improvements 5
- Document Viewer & Web Takeoff..... 6**
 - Updates to the Actions dropdown 6
 - Production Bug Fixes 6

BID CENTER

Invitation Forwarding: Notification Messaging & Performance Upgrade

- When you forward an invitation to bid to bidcenter@constructconnectmail.com you'll now receive a message if you're currently logged into the application to let you know that your invitation has been received and processed. Also, your forwarded invitation to bid now automatically appears in your Bid Center Inbox without any need to refresh the page.
 - **✓ Value:** Message appears in app to let you know that your forwarded invitation to bid is ready to review and confirm.
 - **✓ Value:** No more reloading the page to see if your forwarded invitation to bid has been processed yet, it'll appear automatically when it's ready for your review.

Step 1: Notification Messaging and Forwarded Project in Inbox

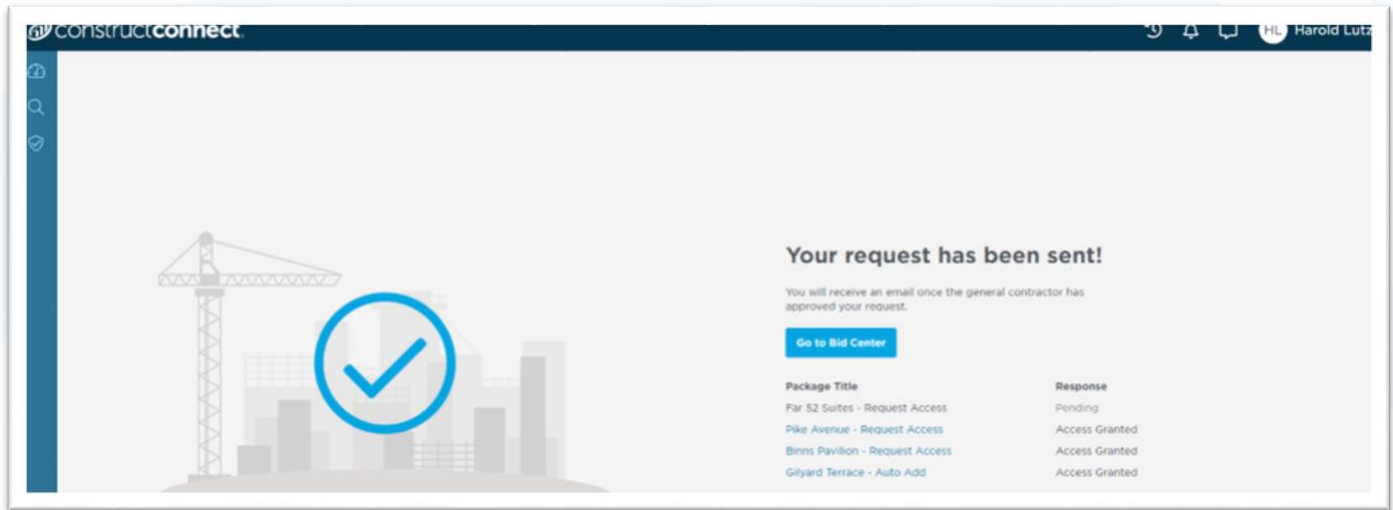

The screenshot shows the Construct Connect Bid Center interface. On the left, there are filter options for Assigned, Location, Events, Bid Date, and Building Use. The main area displays a table of projects in the 'Inbox' status. A green notification banner at the top right states: "Your forwarded invitation has been added. Please confirm your project." The table lists several projects, including "Nippert Expansion to 100,000 Seats - Far 52 Suites - Request Access" and "Brent Spence Bridge Replacement - All Trades".

Project Name	Status	Assigned	Location	Match	Bid Date	Internal ID	Source	Inviting Company
Fwd: WinCo 160 - Bozeman, MT - ...	Confirm Project		Bozeman, MT	N/A				
Hampton Inn & Suites	Confirm Project		2312 Westover Road - Gillette,...	N/A				
Tuscola Connector Bridge	Confirm Project		San Francisco, CA	N/A				
Dawson-Boyd School Improvements	Confirm Project		Dawson-Boyd ES/High School	N/A	May 28, 2...			
Nippert Expansion to 100,000 Seats - Far 52 Suites - Request Access	Inbox	Harold Lutz	OH	2/5	Oct 31, 20...	Enter Internal ID		Hephaestus Automation...
Nippert Expansion to 100,000 Seats - Pike Avenue - Request Access	Inbox	Harold Lutz	OH	2/5	Nov 14, 20...	Enter Internal ID		Hephaestus Automation...
Nippert Expansion to 100,000 Seats - Gilyard Terrace - Auto Add	Inbox	Harold Lutz	OH	2/5	Nov 21, 20...	Enter Internal ID		Hephaestus Automation...
Nippert Expansion to 100,000 Seats - Binns Pavilion - Request Access	Inbox	Harold Lutz	OH	2/5	Nov 28, 2...	Enter Internal ID		Hephaestus Automation...
Brent Spence Bridge Replacement - All Trades	Inbox	Harold Lutz	Covington, KY	2/5	Feb 28, 20...	lov-the-cov		City of Covington

ConstructConnect ITB Share: Request Access Status Page Update

- After requesting access to a shared project, you will now see a status table for the project that includes the status of your access request.
 - **✓ Value:** You'll always be informed about the status of your project request.
 - **✓ Value:** If there are multiple packages that you've requested access to on a project shared from iSqFt you'll now see the access status for all the packages in one page.

ConstructConnect ITB Share Request Access Status Page

No Reloading of Bid Center when returning from Project Details Page (PDP) or Calendar

- When loading Bid Center and then navigating to a PDP or Calendar you will not experience another loading of Bid Center when you return.
 - **✓ Value:** Removing the need to load again boosts performance for all Bid Center users who won't have to wait for Bid Center to load again when returning from a project page or calendar.

External Share: enable custom projects sharing for paid users

- **✓ Value:** You can now collaborate on all project types, including projects created by yourself

Feature	Bid Management	External Share of Custom Project
User creates project	3 easy steps	2 easy steps
User adds trades	Yes	Not possible
User shares externally	from directory or network, no limit on recipients	Up to five emails at a time, no address book
Recipient tracking	Advanced, with time-saving graphs and visualizations	can see if user viewed project, date project shared
Recipient response	Response is tracked	Communication must happen outside the system

Responsiveness: custom Project Details Page (PDP) and external share modal

- **✓ Value:** You can now comfortably use external share on tablet and mobile screens
- **✓ Value:** You can now comfortably view and edit custom PDP on tablet and mobile screens

Edit Custom Project Details Page (PDP): debounce performance improvement

- When user is editing custom PDP the system will now collect all the changes made within the last 2 seconds and then will update the record with this batch of changes.
 - ✓ **Value:** You can now make quick edits to custom PDP without a risk of system not catching up with you

Bid Center Quality Improvements

- Calendar/Grid View user selection is now remembered and used as a home page view
- Edit Custom PDP: Turning on/off mandatory indicator doesn't alter event time anymore
- Calendar View: Unassigned value in Assigned dropdown is now displayed at the beginning
- Multiple fixes for responsive and user interface issues on custom PDP and external share modal

PROJECT INTELLIGENCE

Redesign and refactor the Trades filter for performance and convenience

- ✓ **Value:** Reduce 500 errors and increase saved search load and save time
- ✓ **Value:** Remove duplicate 6 digit codes from trades filter for easier navigation and less confusion when locating and selecting trades
- ✓ **Value:** Updated the user interface for the applied trades filter to make it easier to interact with when modifying trades

Allow user to edit Contact Address in Your Information under You and Your Company

- ✓ **Value:** User can change their contact zip code which will determine where they show up in a General Contractor's search, ensuring that they are invited to projects in their service area
- ✓ **Value:** Information in iSqFt will stay synchronized and General Contractor's will have the correct contact information for a Trade Contractor

Display a hint in the Zip Code field of the Build Your Profile modal

- ✓ **Value:** Improve the first experience for a new user

Pushing to Takeoff displays an error message when a user does not have access to project documents

- ✓ **Value:** The user will stay on the Project Detail Page and their workflow is not interrupted.

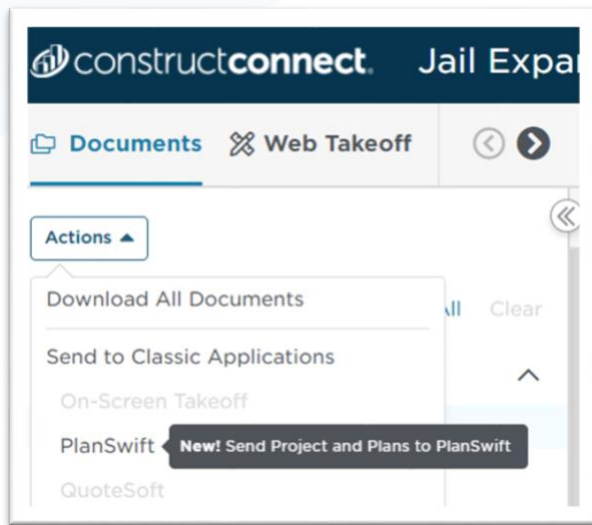

Project Intelligence Quality Improvements

- Check boxes are properly aligned in column header picker on search results grid.
- Improved performance on search tag jobs running properly in the backend - ensuring prompt search tag updates.
- Build Your Profile modal displays fully in the screen without having to scroll regardless of the number of states displayed.
- Pushing a project to Takeoff in Firefox works properly.

DOCUMENT VIEWER & WEB TAKEOFF

Updates to the Actions dropdown

- Updated the user interface for the Actions dropdown to distinguish the active link

Production Bug Fixes

- Fixed issues with certain unsupported file types not displaying the unsupported image message.
- The Web takeoff and ConstructConnect Takeoff buttons will be enabled after custom project documents have been processed.
